## New at Controller Akademie

### CMA<sup>®</sup> Certification for Professionals in cooperation with IMA<sup>®</sup>

The CMA<sup>®</sup> (Certified Management Accountant) is the advanced professional certification specifically designed to measure the accounting and financial management skills that drive business performance in globally active organisations.

The CMA<sup>®</sup> is a tailor-made certification programme for finance professionals at all levels in order to enhance their value to a current organisation or to expand their career potential.

The CMA<sup>®</sup> programme allows for participants to proceed with self-study at their own pace. It is designed to be time-efficient and cost-effective.

#### CMA<sup>®</sup> with Controller Akademie

Controller Akademie is offering an exclusive CMA<sup>®</sup> package between November 2012 and March 2013. It encompasses the complete CMA study package as well as a tutorial with live instructor-led sessions.

# CMA® with Controller Akademie

Our tutorial will guide the participants through an intensive review of the CMA programme's complete syllabus

## Tutorial Profile

The two days of the course will have a clearly defined structure and content covering subjects that are highly likely to be new to the students.

We particularly focus on US-specific topics which are different to the European approach. In addition, the first session will review the CMA learning outcome statements to familiarize students to the contents of the CMA.

The students will be asked to review these statements and to reflect their existing knowledge. This exposure will enable them to sit for the CMA exam immediately or, if appropriate, target their further learning efforts more effectively.

## Controller Akademie Instructor-Led Tutorial

The two day instructor-led tutorial by Controller Akademie covers the syllabus for both parts of the exam. It prepares participants thoroughly for the exams, that are administered through the worldwide network of Prometric Testing Centers.

Participants in the specially tailored Controller Akademie tutorial are expected to be well acquainted with the complete CMA syllabus in order to be able to follow all the subjects and content covered in-depth during the tutorial.

## Controller Akademie Tutorial Instructors

**David Fairchild:** Extensive experience in multiple areas of corporate finance and accounting for US multinational corporations with operations in Germany, Austria, and the Russian Federation. Certified Public Accountant (CPA) and Certified Management Accountant (CMA).

Certified Global Management Accountant (CGMA) from the AICPA in the US and the CIMA in the UK. Membership in the American Institute of Certified Public Accountants (AICPA) and the Institute of Management Accountants.

**Dipl.-Ing. Dietmar Pascher:** Partner and Trainer of the Controller Akademie AG, Manager International Program

## Who profits from the CMA® certification?

Financial professionals with an education and/or experience in finance and controlling outside the USA who would like to expand their knowledge about the US corporate finance environment by obtaining a widely recognized global accounting certification for corporate finance professionals.

The CMA® today is basically a common prerequisite for controlling obligations in globally active companies outside of Europe.

The CMA® exam is designed specifically to validate mastery of the advanced skills required to manage finance functions within globally active organisations. Achieving the CMA credential demonstrates mastery of financial planning, analysis, control, and decision support. A number of multinational corporations, government and non-profit organisations, academic institutions as well as private firms will benefit greatly from the knowledge of CMA® certified controllers.
